Monitoring the European Open Science Cloud (EOSC)

The EOSC Observatory is a [policy intelligence tool](#) being developed by the EOSC Future project for monitoring policies, practices, and impacts related to the European Open Science Cloud (EOSC). It will support the EOSC community in tracking the implementation of EOSC and the policy makers in developing actionable policies.

- Online dashboard to track policies, practices, and impact of EOSC and Open Science
- Survey tool to collect data in backend and interactive public dashboard to openly present data
- Support monitoring of EOSC readiness of EU MS/AC and (financial) contributions to EOSC
- Support alignment and development of policies and practices for EOSC with data, use cases, and mutual learning

EOSC Monitoring Ecosystem

1

Indicators to Monitor EOSC Readiness

The EOSC Steering Board has developed indicators to monitor the EOSC readiness of countries in Europe via an annual survey on National Contributions to EOSC

2

Indicators to Monitor EOSC Partnership

The EOSC Association has developed indicators to monitor the implementation of the EOSC Partnership by members via an annual survey on Key Performance Indicators

3

Contributions to EOSC Partnership

The EOSC Association will monitor the financial and in-kind contributions to the EOSC Partnership by members via an annual survey on the Additional Activities Plan

4

Policies Relevant for EOSC Ecosystem

Various stakeholders in the EOSC ecosystem (including projects and experts) are monitoring the implementation and uptake of EOSC via surveys on policies relevant for EOSC

EOSC Observatory

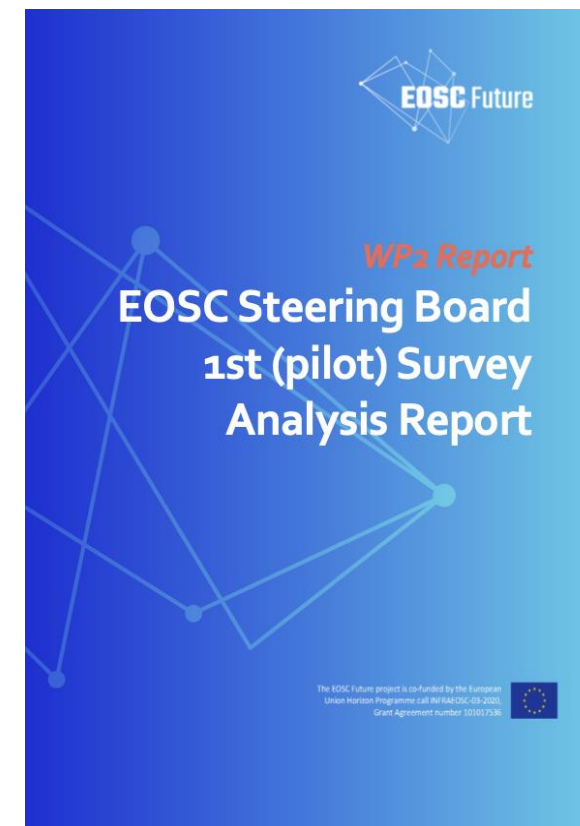

The EOSC Observatory is a policy intelligence tool developed by the EOSC Future project to monitor policies, practices, and impacts related to the European Open Science Cloud (EOSC).

The EOSC Observatory consists of an interactive dashboard for users to visualise and exploit data that is collected by annual surveys on the implementation and uptake of EOSC in Europe.

The EOSC Observatory will support the EOSC community in tracking the implementation of EOSC and will support policy makers in aligning and developing actionable policies for EOSC.
