EOSC Portal Marketplace

https://marketplace.eosc-portal.eu

Currently onboarded:

- **237** Providers
- **365** Resources
- **52** Communities and Infrastructures
- **17** defined target groups

Access to the OpenAIRE Research Graph

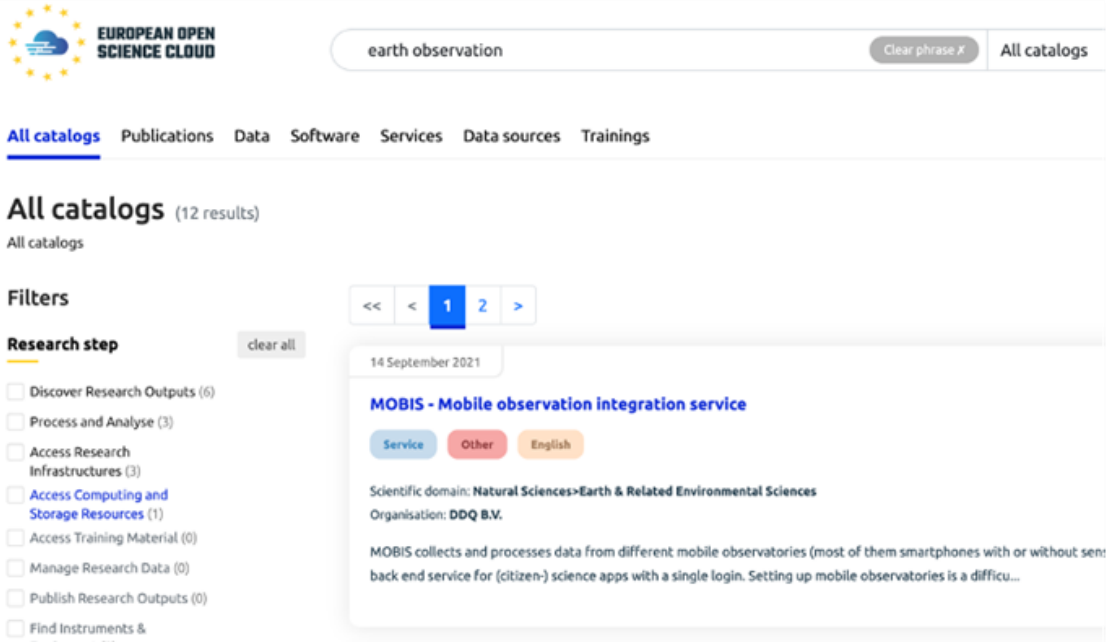
- **1.9million** publications
- **1.2million** datasets
- **170k** software entries

EOSC Portal Marketplace

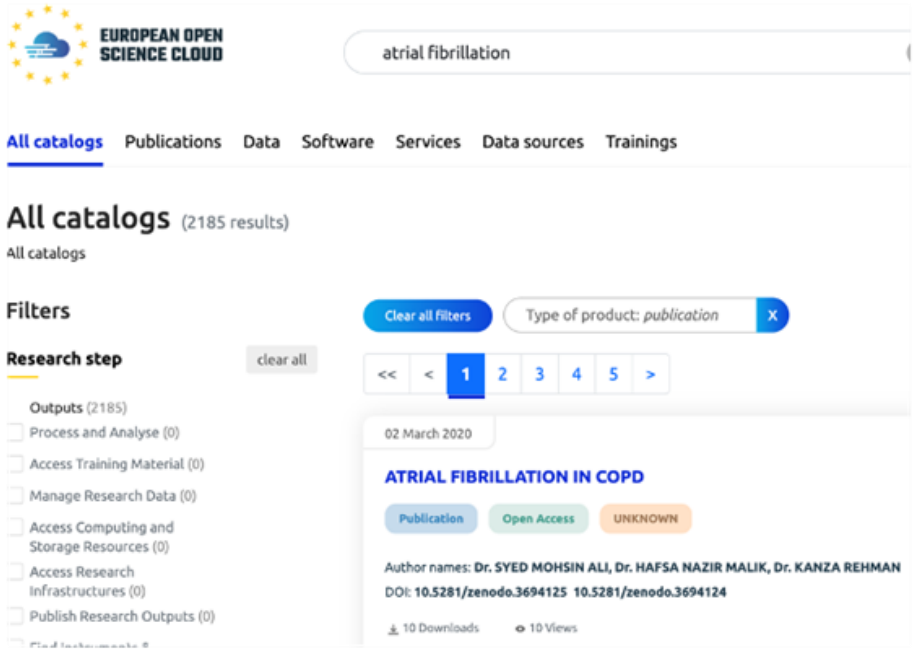
https://marketplace.eosc-portal.eu

One place for research products, services, publications, software,…

e.g. “Earth Observation”: 12 services, 1 datasource, 23153 publications, 1512 software, 5792 datasets



e.g. “Atrial Fibrillation”: 2185 publications, 18 software, 711 datasets



Why onboard?

For Service Providers:

- Integration with the Core
  ordering, helpdesk, AAI, security,…
- Benefits of all EOSC components
- Visibility for new users
- Enable composability with other onboarded services

Benefits for Users:

EOSC Portal is a single point to:

- Discover resources
- Order+access resources
- Compose resources

Criteria for becoming an EOSC Provider

- Be either be a legal entity or connect to the registration of a hosting legal entity already onboarded as a provider under their own profile.
- Have resources targeted to EOSC and EOSC communities or built on or leverage EOSC capabilities to serve some other community.
- Mature service (TRL7 or above)
- Provide essential information
- Commit to an effective service delivery.
- Agree on periodically updating data on themselves and their resources.

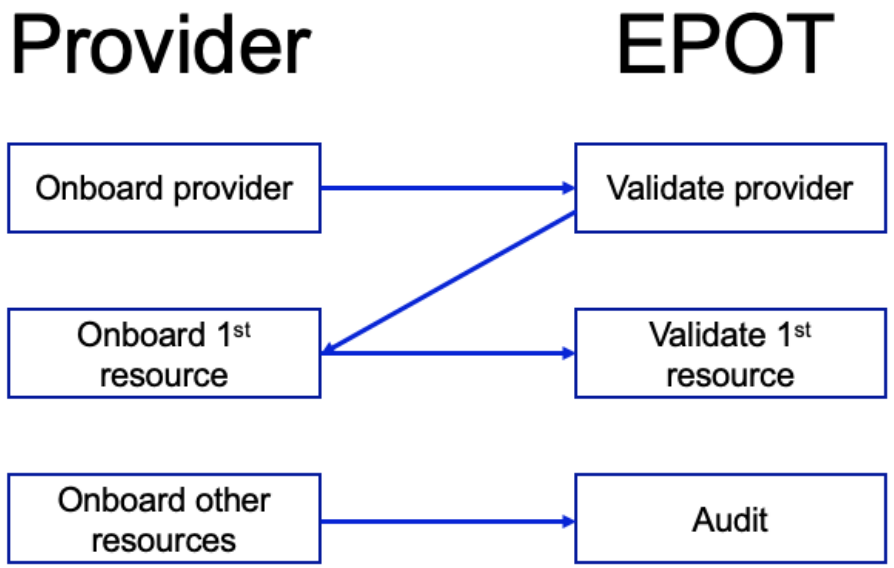
Validation of the criteria for becoming an EOSC Provider

The EOSC Portal Onboarding Team (EPOT) manages and assesses compliance with the inclusion criteria. It is run as a collaboration between the EOSC Future and other EOSC projects.

Contact the EPOT for queries about onboarding to the EOSC Portal onboarding@eosc-portal.eu

Onboarding Providers and resources in the EOSC Portal

Step 1	Comply with the EOSC Provider Inclusion criteria
Step 2	Fill-in the EOSC Provider profile form & receive validation
Step 3	Onboard the first service & receive validation
Step 4	Onboard the second service (& be audited if needed)



From onboarding services to much more

- Services/resources
- Data sources
  - inc. repositories, aggregators, registries, catalogues, publisher archives, etc.
- Catalogues of services/repositories
  - Via acceptance of a Catalogue Onboarding Agreement
- Data products and other research products
- Training material
- EOSC Interoperability Framework guidelines

Online information & training to support onboarding
