Perspectives on further contributions to the value of EOSC

The Knowledge Hub is a centralised learning hub for all things EOSC, integrated into the EOSC Portal

- Available to all EOSC Portal Users
- Open to contributions from all providers
- Key to ensure that value added by all the EOSC components can be realised
- Open door to users that want to use the EOSC resources but don't know how
- Other stakeholders of the EOSC ecosystem are in charge of dissemination and raising awareness

Perspectives on further contributions to the value of EOSC

KH components complement each other and the wider EOSC ecosystem

Learning Platform

<https://openplato.eu/>

- Providing learning content on Open Science, the EOSC and how to benefit

Training Catalogue

https://search.eosc-portal.eu/search/training?q=*

- With all the learning content you need!

Scientific domain specific
EOSC service specific
Facility specific

Helpdesk / support

- To ensure support is provided to users

Perspectives on further contributions to the value of EOSC

Maturity status:

- Knowledge Hub landing page is at design stage
- Learning Platform is available
 - content will grow over time
- Training Catalogue is available
 - limited content, awaiting changes to onboarding & metadata vocabulary
 - search, filters and recommendations will improve as content expands
- Helpdesk
 - technical implementation is relatively straightforward
 - need to operationalise to make it both useful and sustainable

Perspectives on further contributions to the value of EOSC

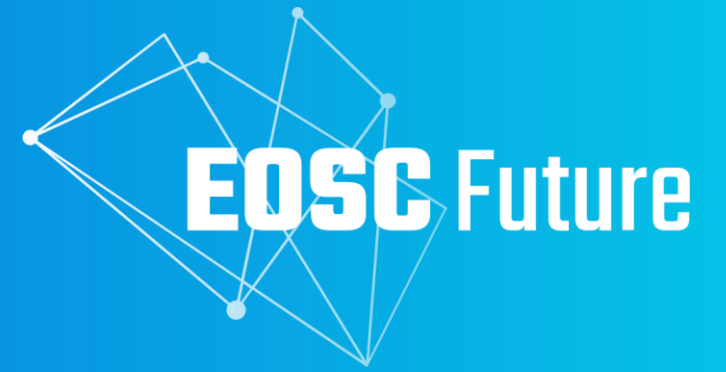

The key to a successful Knowledge Hub is:

Content

- this will grow over time

Usability

- aim to deliver state of the art UX so the interface is not a barrier for users
- users that understand and know how to benefit from the EOSC Portal and the wider ecosystem will make the EOSC successful

Thank you!

Any questions?
