

PIDs in the FAIR-IMPACT project

Jessica Parland-von Essen
WP lead

EOSC is an environment for hosting and processing research data to support EU science

The ambition of the European Open Science Cloud (EOSC) is to provide European researchers, innovators, companies and citizens with a federated and open multi-disciplinary environment where they can publish, find and re-use data, tools and services for research, innovation and educational purposes.

The EOSC enables a step change across scientific communities and research infrastructures towards

- seamless access
- FAIR (Findability, Accessibility, Interoperability and Reusability) management
- reliable reuse of research data and all other digital objects produced along the research life cycle (e.g. methods, software and publications)

The EOSC Association has been set up to provide a single voice for advocacy and represent the broader EOSC stakeholder community.

Expanding FAIR Solutions across Europe

Call HORIZON-INFRA-2021-EOSC-01-05

Enabling discovery and interoperability of federated research objects across scientific communities

**36 Month EU
funded project
started in June 2022**

**28 partners involved
in the project**

**Coordination and
Support Action**

**4 project
management
and governance
bodies**

**3 coordination
mechanisms**

**4 Support Tiers
to enable
adoption and
implementation**

FAIR-IMPACT overall objective

WHAT:

to realise a FAIR EOSC by **supporting the implementation** of FAIR-enabling practices across scientific communities and research outputs at a European, national, and institutional level;

HOW:

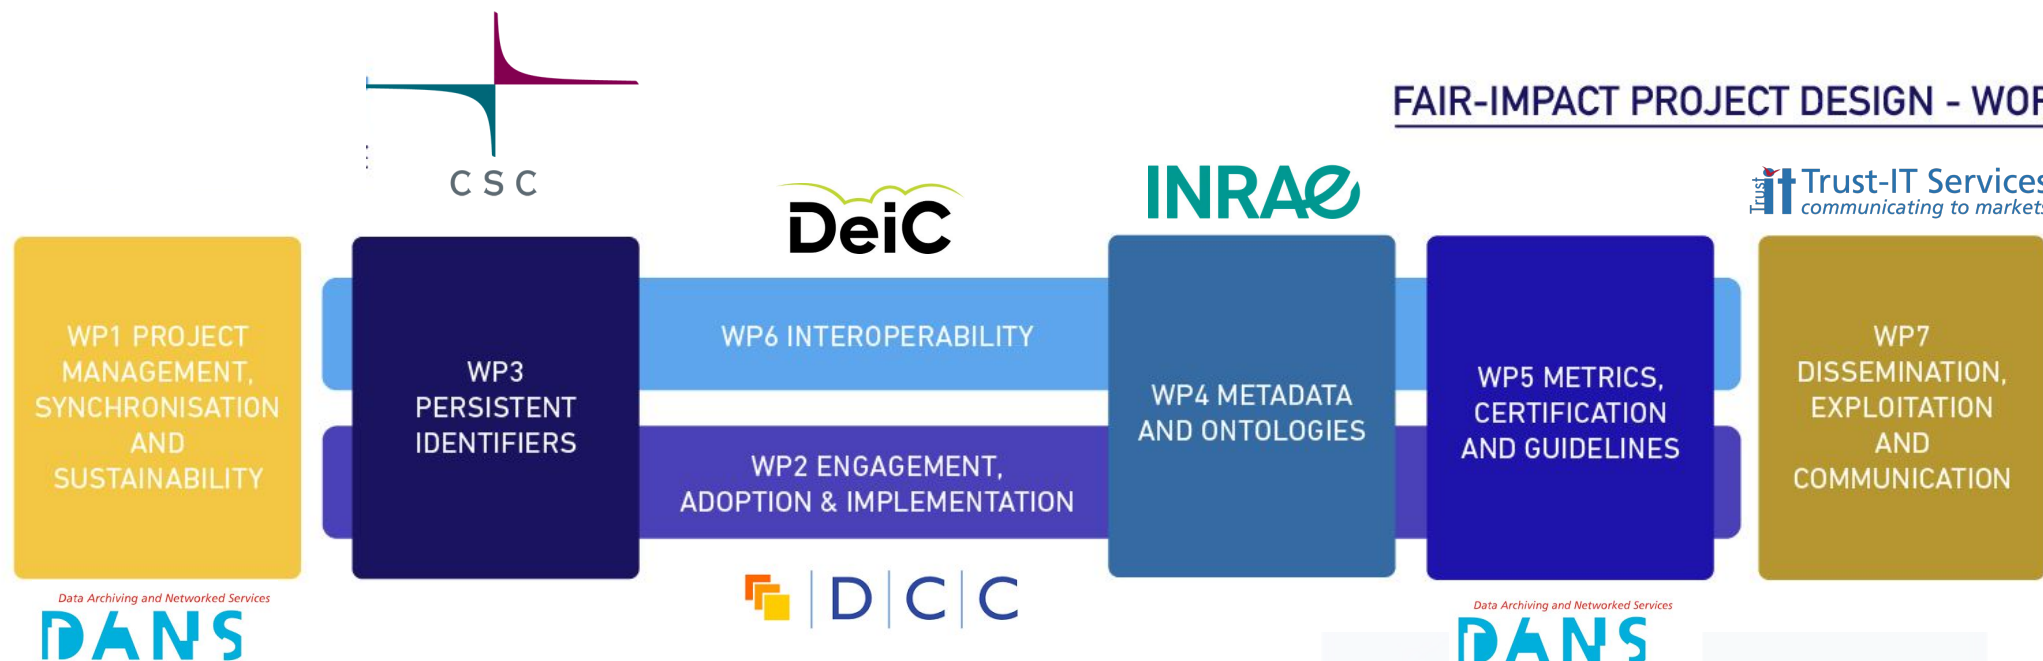

- **identifying** current and emerging components for enabling FAIR (practices, policies, tools & technical specifications);
- **translating** viable solutions, guidelines and frameworks that have been developed for one domain or research output and **supporting** their application in others;
- taking the next step in implementation by **defining** the support, governance, and coordination mechanisms required to ensure the continuous function of FAIR-enabling practices in the EOSC.

FAIR-IMPACT Work Packages

FAIR-IMPACT PROJECT DESIGN - WORK PACKAGES

Selection of key tasks

- Setting up a coordination mechanism for PID service providers to help them align services with the EOSC PID policy
- Jointly creating a shared long term vision for PID usage in the EOSC context
- Creation of a blueprint for PID practices in FAIR data management to be explored for adaptation by other communities
- Creation of guidelines to support the definition of EOSC compliant PID policies and PIDs

Key expected outcomes

- More coherent implementation of PIDs and more exact data citation leading to better data quality.
- A broader and more targeted use of PIDs, avoiding creation of zombie identifiers, corrupting trust in PID services and risking galloping costs.
- A well designed use of PIDs for sensitive data (including kernel metadata and rights), enabling research with sensitive data without transferring data across borders or outside secure environments.

WP 3 PIDs

Task 3.1

Setting up a coordination mechanism for EOSC PID service providers

Task 3.2

Integration of PID practices into FAIR data management

Task 3.3

EOSC PID Policy alignment & support

Task 3.4

PID implementation programme

Building on previous work

Many previous projects and many approaches

Many services, discussions and use cases

Close collaboration with the FAIRCORE4ESOC project and the EOSC A PID Task Force

Towards a shared value proposition for PIDs in EOSC

Helena Cousijn & Gabi Mejias
November 17, 2022

Task 3.1

Shared long-term vision for PID service providers in EOSC (M34)

2) EOSC PID providers coordination mechanism proposed (M16)

3) Align requirements for onboarding PID providers into EOSC, including emerging PIDs (M18)

1) Joint value proposition by relevant PID providers (M10)

PID Value Proposition

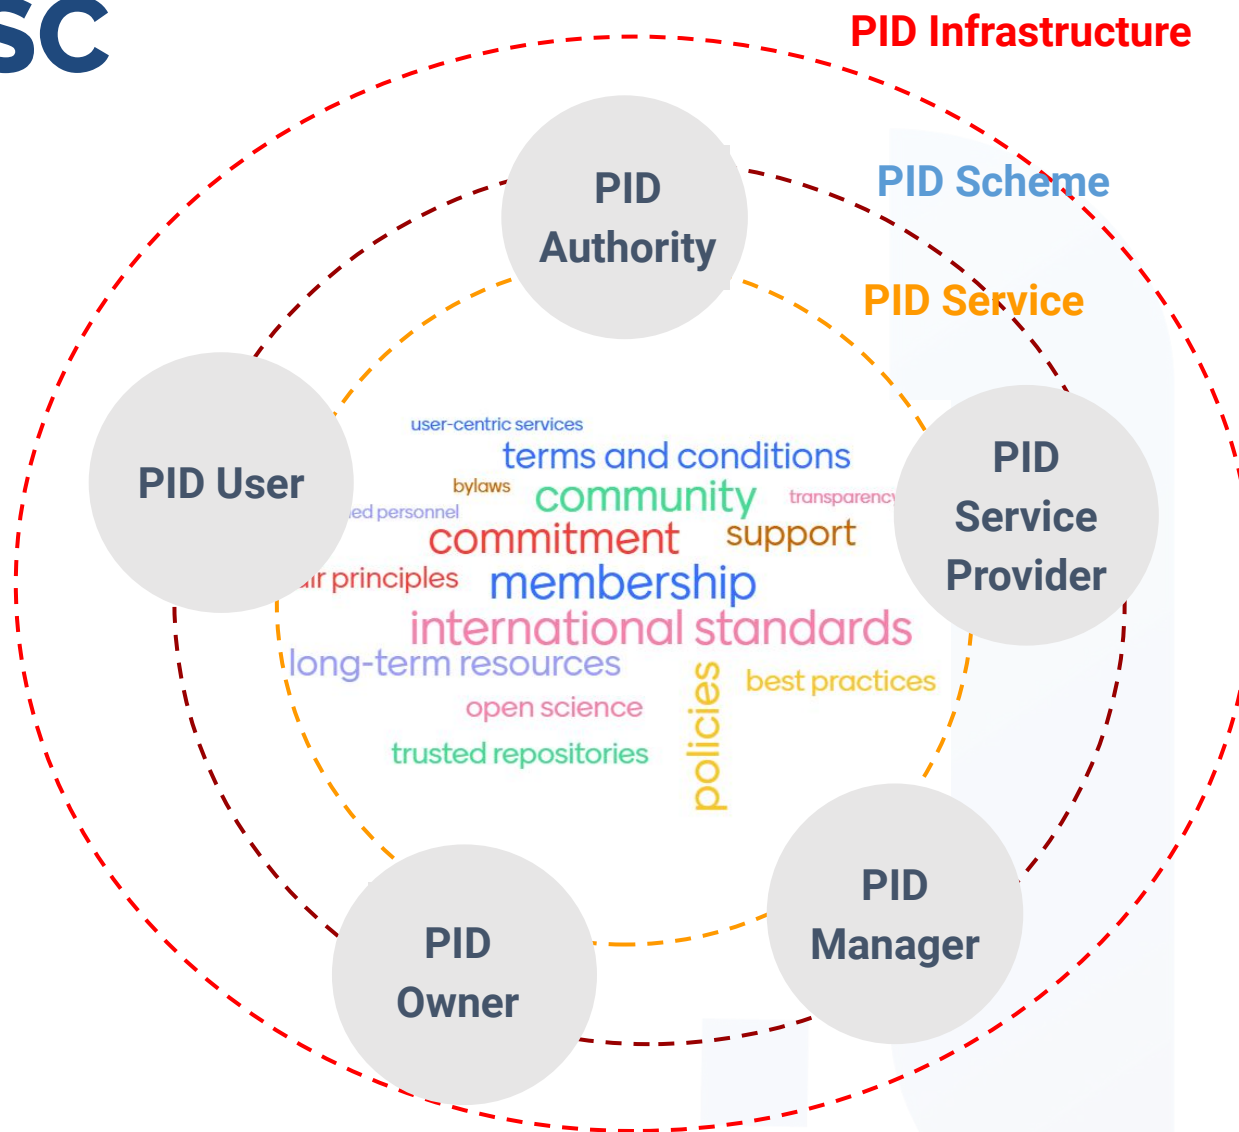

We'll discuss in break-out groups:

- 1) Roles as defined by the EOSC PID Policy - and how these apply to existing PID systems & providers*
- 2) Pain Points that PIDs can solve & Benefits of PIDs for EOSC users*
- 3) Value of PIDs for the research ecosystem*

PIDs in EOSC

It takes a village

What happens next

- 1) Task participants will draft a value proposition document based on today's discussion*
- 2) This draft will be shared with participants for further comment*
- 3) There will be a second workshop next year to discuss milestones 2 and 3 related to PID provider participation in EOSC*
